

International Journal of Electrical Energy

CONTENTS

Volume 2, Number 4, December 2014

Power Electronics

PV Based Three-Level NPC Shunt Active Power Filter with Extended Reference Current Generation Method 258

M. Vijayakumar and S. Vijayan

A Case Study of Resonance in 11kV Network in the Presence of Series Current Limiting Reactors, VSDs and Power Factor Improvement Capacitors.....268

Yadavalli Venkata Sridhar

Traction System with MRAS Sensorless Vector Control and PSM Technique278

Purushottama Rao and Y. S. Rao

Low Power Testing of VLSI Circuits Using Test Vector Reordering284

A. M. Sudha

Power System

Performance Optimization of Photovoltaic Pumping System Based Maximum Power Point Tracking Algorithm289

Mohamed Arbi Khelifi

Competing Risk of Degradation Processes of a Photovoltaic System under Several Conditions295

Fairouz Iberraken, Rabah Medjoudj, and Djamil Aissani

Improved Control of DFIG Systems under Unbalanced Voltage Dip for Torque Stability Using PI-Fuzzy Controller.....300

Hai Nguyen-Thanh

Preemptive Goal Formulation for the Multi-Objective Generation and Transmission Planning Model in a Deregulated Environment.....308

Enrique B. Cedeno

An Application of Scada System for Industrial Control Laboratory314

Y. Birbir, N. F. O. Serteller, Sukru Akkaya, and Salim Behlul Kose

Simulation of Deadbeat Controlled Buck Converter320

Ibrahim Koldanca and H. Huseyin Sayan

Smart Grid

A Hierarchical Routing Protocol for Smart Grid.....325

Mohsen Dorsetan, Azadeh Jafarinezhad, and Sayyed Majid Mazinani

Experimental Study of the Artificial Neural Network Solutions for Insulators Leakage Current Modeling in a Power Network.....331

Ali Bahramiazar and Mohammad Oskuoee

A Secure Spectrum-Aware Routing Scheme by Detecting Black Hole Attacks for Smart Grid Applications ..337

Azadeh Jafarinezhad, Mohsen Dorsetan, Sayyed Majid Mazinani, and Masoud Shirkhani

Power Industry

The Impact of EPA's New Proposed Limits on the U.S. Power Industry343

Tawfiq M. Aljohani
