

# International Journal of Electrical Energy

## CONTENTS

---

### Volume 4, Number 2, June 2016

- A Reliable Strategy in Order to Islanding Detection Based on Combined Active and Passive Techniques.....84  
*Mehdi Ebtehaj, Behrooz Sobhani, and Behnam Sobhani*
- Prediction of Hourly Generated Electric Power Using Artificial Neural Network for Combined Cycle Power Plant.....91  
*Bayram Akdemir*
- Health Status Evaluation of Low-Voltage Distribution Network Based on Rank Correlation-Entropy Method .....96  
*Ji Ma and Xizhe Liu*
- Design of Large-Capacity Battery Energy Storage System and Its Application in Coal Mine.....102  
*Jianna Niu, George You Zhou, and Tong Wu*
- Architecture Conception of Energy Internet and Technical Challenges .....107  
*Yonghua Chen, Renren Deng, Dongmei Yang, and Hongshui Lv*
- Operation and Control of 850kW Doubly Fed Induction Generators Based Al-Zafarana Egyptian Wind Farm .....112  
*Khaled Hamza El-Sayed, Doaa Khalil Ibrahim, and Essam El-Din Abo El-Zahab*
- Improving Flexible Feed-in Tariff Modeling for Renewable Energy Pricing.....122  
*Nurettin Çetinkaya*
- The Application of Hardware in the Loop for Single Phase Converters Based on DSP Controller at Solar Energy Systems .....127  
*Ahmet Karaarslan*
- Fuzzy Control for Solar Photovoltaic Tracking System.....133  
*Mauricio Mauledoux, Edilberto Mejia-Ruda, Angie Valencia, Oscar Caldas, Oscar Aviles, and Ferney Medina*
- Techno-Economic Feasibility of Energy Supply of Remote Zone Family House in Jordan Badia by Photovoltaic System and Diesel Generators.....137  
*Mohammad Al-Smairan*
